

## 14.07 Auxiliary Top Plate type PP/MP for Magnetic Circular Chucks type FM

### Heavy duty construction

#### Applications

Grinding , Turning

#### Construction

. To use with circular magnetic chucks type FM . Laminated blocks transmit the magnetic field of the chuck towards the workpiece. They can be used with any magnetic clamping system that has a parallel pole pitch. They can simply be placed loose on the magnetic chuck surface (respecting radial pole layout) or can be mechanically fitted to the chuck. . Able to withstand harsh applications because no glue or rods have been used to fix the laminations together.

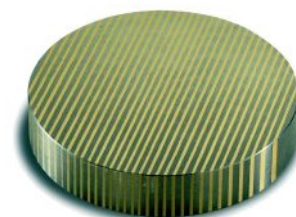

Pole pitch 4.5 mm

Art.-N°14.07		Diagram below: dimensions in mm	
Product	Weight	A	B
14.07.100	2,6	100	21
14.07.130	3,5	130	21
14.07.150	4,2	150	21
14.07.200	5,9	200	21
14.07.250	7,6	250	21
14.07.300	8,9	300	21

#### OPTIONS :

- Other sizes available on request
- Other pole pitch execution
- Special machinings
- Fitting systems
